

## DEEP-DIVE

# Sovereign Programme Deep-Dive

Bridge artefact between public orientation and protected institutional diligence.

Reliance boundary: Terra Vita Hub structures evidence, routing, assurance and export posture. It does not approve, finance, regulate, rate, certify or replace authorised institutional judgement.

## Programme Governance Context

Sovereign and public-interest programmes need shared review environments that do not remove statutory authority from ministries, national MRV bodies, fiduciary agents or financing institutions.

## MRV Attachment

National MRV systems, methodologies, indicators, evidence objects, verification logic and reporting outputs remain connected without Terra Vita Hub replacing national MRV authority.

## Public to Protected Route

- Public orientation establishes governance posture.
- Institutional review index routes reviewer questions.
- Minimum evidence request defines the diligence package.
- Protected workspace holds evidence, reviewer actions, funding context and export logs.

Document control: v347 public visual QA sweep. Generated for Terra Vita Hub search, institutional review routing and artefact integrity verification. No confidential or programme-specific evidence is included.
